

# SMARTWASH

A customisable wash controller that optimises your cleaning routine and ensures consistency.

## EFFORTLESS OPERATION AND OPTIMISED CLEANING FOR IMPECCABLE RESULTS

Enjoy a consistent milking machine wash process, precise detergent dispensing to reduce costs, and enhanced operator safety. Free up valuable time with SmartWASH, the tamper-proof solution that brings ease and precision to your wash system.

Take control of the wash cycle effortlessly through its touch-screen digital operator interface. Comprehensive data logging ensures every event is recorded, while ten wash programs offer unparalleled flexibility. Smart interlocks prevent washing when milk is in the silo, enhancing safety. Equipped with a high-spec stainless-steel temperature sensor, SmartWASH guarantees precision in temperature control. Security is paramount with PIN protection, and optional features like detergent sensors and a modem offer additional customization. Upgrade to SmartWASH and revolutionise your milking machine hygiene today.

### Optimises the cleaning regime

Selectable wash scenarios created from a comprehensive menu, at the touch of a button.

### Ensures consistency

A repeatable, efficient and reliable wash cycle every time.

### Ensures accurate dispensing

Accurate detergent dispensing minimises cleaning chemical wastage, saving on cost, while improving operator safety.
